

# TOP 5 IVE

## REASONS to call All Star Construction for your project:

- 1 Guaranteed pricing and project schedule.
- 2 Industry leading design process.
- 3 Benefit from an entire team of professionals with extensive design and construction experience.
- 4 Visualize your completed project before the work begins.
- 5 Over 25 years of experience remodeling homes in the Black Hills.

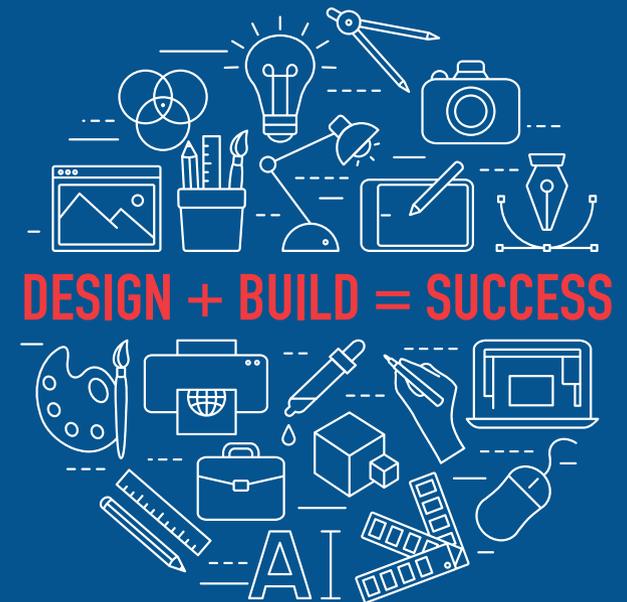

## The Remodeling Professionals

At All Star Construction, we believe that putting our clients into a Design + Build team relationship at the very beginning produces successful projects. Our clients are asked to list their expectations, their project needs and goals, and their budgets or financial investment range for their project. As both the designer and the contractor, All Star Construction, can produce elevations and floor plans, a guaranteed contract price, and build the exact project you envisioned. We have proven time and time again this is a formula for success for all involved.

**DESIGN + BUILD = SUCCESS**

A PROFESSIONAL DESIGN / BUILD COMPANY

## Who We Are

All Star Construction, Inc. is a professional full service remodeling contractor with 25 years of experience and service in the Black Hills of South Dakota. We utilize a Design + Build process to develop your ideas into computer generated plans, elevations, and 3-D renderings for planning, decision making, and complete construction.

As a full service remodeling contractor, All Star Construction's skilled production staff can help you with your smallest projects, your new kitchen, the addition you need, or maybe the custom home you have been dreaming of. All Star Construction is the right call to make when you have a project, no matter what it is!

# DESIGN + BUILD

**Discover** This is when we start to get acquainted. We want to learn about your remodeling hopes and dreams, and the budget you would like to work with. In this step we share more information about our Design + Build process, our designers, and carpenters.

**Design** First we review the design agreement. Next our designers combine your vision with our imagination to create initial drawings of your project. Finally, preliminary estimates help us hone the design to accommodate your budget.

**Develop** With the scope and style of the project defined, construction drawings, specifications and schedules are prepared to become the basis of a fixed price construction agreement.

**Deliver** One of our experienced lead carpenters is assigned to build and manage your project from start to finish. Consideration is given to your needs and lifestyle during the course of construction. Areas not remodeled are protected to reduce dust intrusion until the project is completed, cleaned, and prepared for you to enjoy.
